

NCVT PLACEMENT MODULE

1. INTRODUCTION

Placement module is an important function of an ITI, this module captures all details of the candidates passed out through system or separately entered in the system. This module is available to the industries throughout country and enable the functionalities to list the available or vacant jobs in their establishment. Facility for registration of the establishment is given for industry, It allow industries to access the information on the availability of trainees with particular skills set who have passed out of each ITI. Users can directly apply for the jobs on this portal.
